

~~CONFIDENTIAL~~

24 March 1988

MEMORANDUM FOR THE RECORD:

SUBJECT: [redacted] Concerns

1. On 23 March 1988 I received a call from [redacted]
[redacted] He voiced three concerns. They and my
response to them are as follows:

a. He was concerned about the trees which were cut down (for our new sewer line to the pumping station) which now allow our perimeter lights to be more visible. He was told that approximately 16 trees were put back in the area and that some of them have unfortunately died. I said they would be replaced.

b. He said that there were some new bright lights which were shining from our property towards his property. From his description I feel he was talking about some high intensity lights at the entrance to the DCI garage. I did not offer this information to him but said we would attempt to identify the source of this "objectionable" light.

c. He also inquired as to "What's this I hear about another building going up out there?". I said I had no knowledge about another building. He said he had heard we are building a day care center and voiced his objection to that and any more construction at CIA. I offered no further information on the subject.

2. I recommend that the Facilities Management Division investigate the light issue and get back to [redacted] through the Public Affairs Office.
